

Is your child with autism having trouble talking? Do you want to learn strategies to help you better communicate with your child?

You may be eligible to participate in a research study if your child:

- Has a diagnosis of autism spectrum disorder
- Is between 5 and 8 years old
- Has fewer than 20 spontaneous spoken words

You and your child will receive:

- Assessments of language and communication skills at no cost to you
- A systematic parent-coaching protocol involving the use of an iPad

What we will ask you to do:

- Come to the Hussman Institute for Autism for several 1-2 hour assessment sessions
- Fill out forms that tell us about your child's communication
- Participate in two parent-coaching sessions per week for approximately 12 weeks at the Hussman Institute for Autism
